

## Super Adsense Theme Instructions

The Super Adsense theme is easy to use, all you need to do is make sure you follow these instructions carefully.

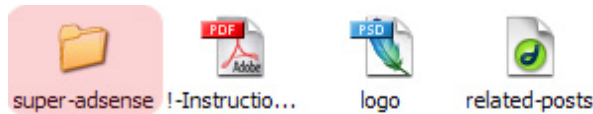

If you're a newbie to blogging and using Wordpress, I strongly recommend that you also try the "Wordpress Adsense System" for a complete step-by-step guide:

[Click Here for Wordpress Adsense System](#)

***Please note that this theme is only for self-hosted Wordpress blogs, and not for free Wordpress.com blogs or even Blogger blogs.***

---

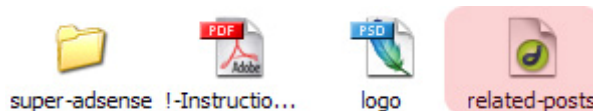

## 1) Upload the entire theme to your web host

Upload the entire **“super-adsense”** folder using your FTP program to your Wordpress themes folder, under *wp-content/themes* like the this:

YourDomain.com

```
--> www
    --> wp-content
        --> themes
            --> super-adsense
```

Upload the files **related-posts.php** using your FTP program to your Wordpress plugins folder, under *wp-content/themes* like this:

YourDomain.com

```
--> www
    --> wp-content
        --> plugins
```

If you don't a web hosting account yet, try out recommendation here:  
<http://www.easywordpress.com/go/hosting-tif>

If you don't have an FTP program, you can download FileZilla for free here:  
[http://www.download.com/FileZilla/3000-2160\\_4-10383825.html](http://www.download.com/FileZilla/3000-2160_4-10383825.html)

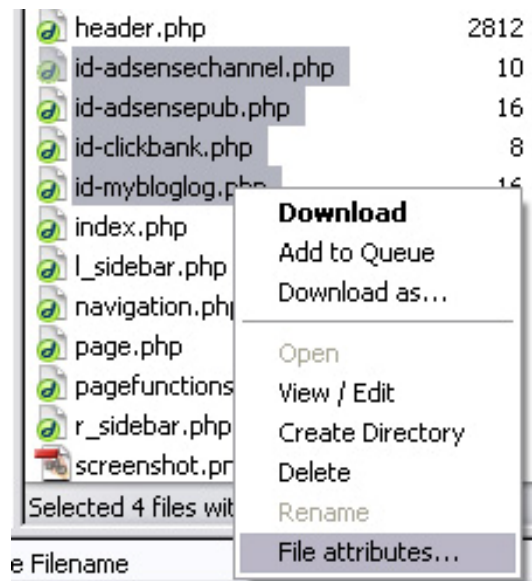

If you don't know how to use an FTP program, here's a free tutorial:  
<http://www.pageresource.com/putweb/ftptut1.htm>

## 2) Set the Correct Access Permissions

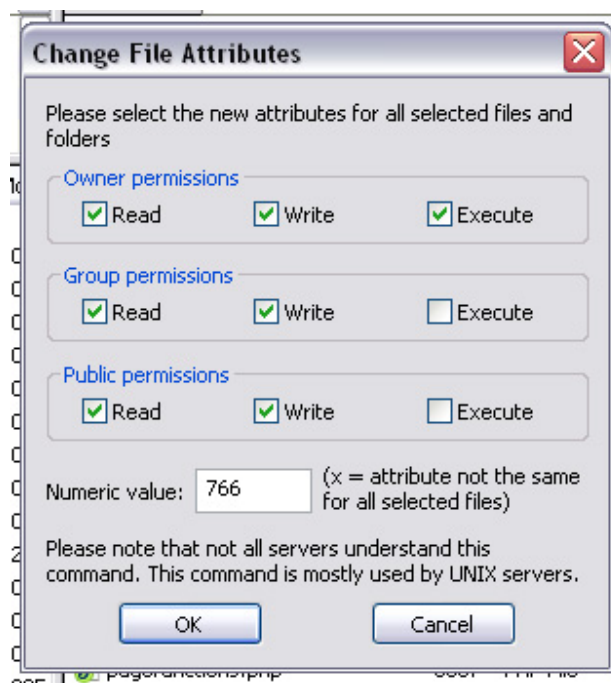

You'll need to set the file permission to **“766”** for the following files:

id-adsensechannel.php  
id-adsensepub.php  
id-clickbank.php  
id-mybloglog.php  
navigation.php

In your FTP program, right click on the files and select "File Attributes":

Then set the file permissions to 766 and click "OK":

### 3) Get Your AdSense Publisher ID

If you don't have an AdSense account, you can apply for one here:

<http://www.google.com/adsense>

Log in to your account, and click on "My Account" where you'll see your Publisher ID (numbers):

Property info	
AdSense for Content:	ca-pub-9348221948414274
AdSense for Search:	partner-pub-9348221948414274
Referrals:	ca-ref-pub-9348221948414274

### 4) Get Your Clickbank ID and Join Our Affiliate Program

Make sure that you have a Clickbank ID, or you can get a new one here:

[www.clickbank.com](http://www.clickbank.com)

After you've got your Clickbank ID, sign-up for our affiliate program here:

<http://www.easywordpress.com/affiliates.php>

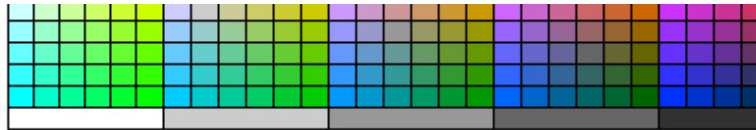

### 5) Sign-up for MyBlogLog and Get Your ID

MyBlogLog.com is a great way to build buzz about your blog and get loyal traffic. The Super AdSense theme is already MBL-enabled, so you'll need to create your account first if you don't have one.

Sign-up for free: <http://www.mybloglog.com>

Once you've set-up your blog details, make sure you copy your "MBL-Id" or write it down. Note that each blog you list will have a different ID.

Go to *Account* → *Widgets* and see look for our ID in the code:

```
<script type="text/javascript"  
src="http://pub.mybloglog.com/stats.php?  
mblID=2007011404115566&camp;width=180&ma
```

Note: TypePad users, [click here to add Top Links to your blog.](#)

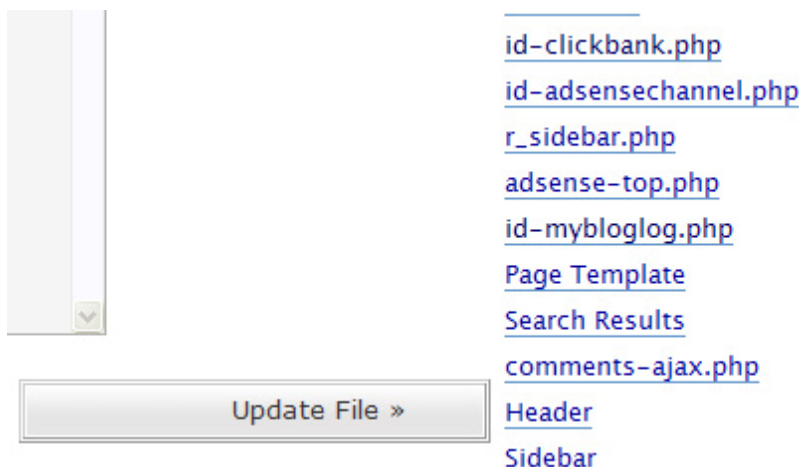

## 6) Login to Wordpress and Edit Your Details

Login to your Wordpress account, and click on *Presentation* → *Themes*. You'll see the Super AdSense theme here. Click on its screenshot to activate the theme.

Next, click on *Presentation* → *The Editor* and replace the values on these files with your own:

- id-adsenspub.php → Enter your AdSense Publisher ID
- id-adsensechannel.php → Enter your AdSense Channel ID
- id-clickbank.php → Enter your Clickbank ID
- id-mybloglog.php → Enter your MyBlogLog ID

**NOTE:** If you do not see an "Update File" button anywhere on the screen, it means you did not do STEP 2 properly, so do it again.

## 7) Related Posts Plugin Customization Instructions

You will notice a "Related Posts Options" tab under your "Plugins" tab. If this is your first time installing this plugin please click the link for index table setup script at the bottom of the options page.

### SQL Index Table Setup

If this is your first time installing this plugin you will have to run [this script](#) (opens a new window) in order to create the index table required by the plugin. If this fails, please refer to the readme on how to create it manually.

You only need to do this once when you install the plugin for the first time.

You can adjust the setting to determine how many related articles are shown, but if you need a guide here's some simple settings you can use:

### Related Posts Options

How many related posts would you like to show?:	<input type="text" value="5"/>
Before / After (Post Title) :	<input type="text" value="&lt;li&gt;"/> / <input type="text" value="&lt;/li&gt;"/> <i>For</i> <small>example: &lt;li&gt;&lt;/li&gt; or &lt;dl&gt;&lt;/dl&gt;</small>
Show excerpt?	<input type="text" value="False"/> ▾
Excerpt length (No. of words):	<input type="text" value=""/>
Before / After (Excerpt):	<input type="text" value=""/> / <input type="text" value=""/> <i>For</i> <small>example: &lt;li&gt;&lt;/li&gt; or &lt;dl&gt;&lt;/dl&gt;</small>
Show password protected posts?	<input type="text" value="False"/> ▾

## 8) Create Your Own Custom Navigation

With the Super AdSense theme, you can easily create your own custom navigation, and you can link to internal Wordpress pages, categories, your RSS feed URL, or even to a totally different site!

Click on the file "navigation.php" in your Wordpress account, and you'll see these codes:

```
<li> <a href="<?php bloginfo('url'); ?>/page2/">Page 2</a> </li>
<li> <a href="<?php bloginfo('url'); ?>/category/uncategorized/">Category</a> </li>
<li> <a href="http://www.google.com">Google</a> </li>
```

To link to pages or categories on your blog, all you need to do is to enter as many lines as you want, changing the page name and the link text:

```
<li> <a href="<?php bloginfo('url'); ?>/page2/">Page 2</a> </li>
```

To link to an outside site, you need to change these:

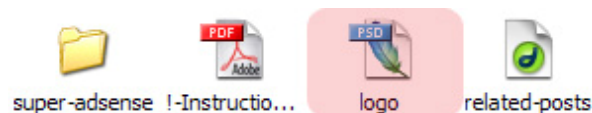

```
<li> <a href="http://www.google.com">Google</a> </li>
```

## 9) Create Your Own Header with Photoshop

You can use the default header we've provided, but we strongly encourage you to create your own header image to these specifications:

Width: 960  
Height: 100  
Type: JPEG  
File Name: logo.jpg

Once you've created your header image, you can replace the default image by replacing the existing **logo.jpg** file in the theme's images folder.

We've also provided the header in **.psd format**, which you can edit with Adobe Photoshop.

## 10) Built-In Support for Popular Plugins

Here are some of the popular plugins that you can use seamlessly with the Super AdSense theme:

**Ultimate Tag Warrior:** <http://www.neato.co.nz/ultimate-tag-warrior/>  
**Sociable:** <http://push.cx/sociable>

The Super AdSense theme has “hooks” for these plugins, which means that once you install them, you will not need to mess around with the theme codes for them to appear and be used.

The theme should also be compatible with any other Wordpress plugin, but some of these may require manual editing of the theme’s files.

## **Congratulations, You Ready To Go!**

Your Super Wordpress Theme is now all set-up to being you residual income from AdSense and Clickbank, and as people start visiting your blog from MyBlogLog.com you’ve also build a loyal community around your content.
